79 Ramp Slope

- *As-Built Description:*

Running slope of existing parallel curb ramp, where the run is less than 15' in length, is less than 5% or more than 8.3%.

- *As-is* Right: 10.4%
- *Proposed Solution:*

Demolish existing and provide new parallel curb ramp including detectable warning surfaces, and top and bottom landings as required.

NE — Curb Ramp Required

2408 Access Route

- *As-Built Description:*
  Curb ramp or blended transition not provided where a pedestrian access route crosses a curb.
- *Proposed Solution:*
  Provide a parallel curb ramp, including detectable warning surfaces, and top and bottom landings as required.

CBC 2007 **1127B.5.1**
ADAAG **4.7.1**
PROWAG **R207.1**

SE — No Sidewalk, Curb Ramp Not Required

921 Pedestrian Access Route

- *As-Built Description:*
  No curb, curb ramp, or sidewalk provided. Pedestrian access route is along the vehicular lane and is not separated by a curb or other cane detectable warning.
- *Proposed Solution:*
  When curb or sidewalk is installed along either street, provide accessible curb ramp.

CBC 2007 **1127B.5.1**

Existing Access Barrier and Proposed Solution

1078 Detectable Warning Surface

- *As-Built Description:*

The detectable warning surface is not located between 6" - 8" from the curb line on a curb ramp or at the edges on a pedestrian island, cut-through median or perpendicular curb ramp. (0" from curb line on a parallel curb ramp.)

- *As-is* 8.0"
- *Proposed Solution:*

Relocate the detectable warning surface.

City of Madera Access Compliance Assessment Report - Pedestrian Signals **4th St**

Survey Street (3)	Cross Street (7)
4TH ST	N D ST

ID (1)	Orientation (2)	Existing Access Barrier and Proposed Solution
40	SW	Clear Floor Space

- *As-Built Description:* (4)

The slope of the floor or ground surface at the pedestrian signal device exceed 1:48 (2%).

- *As-is Measurement:* 2.8% (5)
- *Proposed Solution:* (6)

Modify or repave the ground surface as necessary to provide slope (s) not exceeding the required 1:48 (2%) maximum in any direction.

(8) Codes / Mitigation Info

ADAAG: **4.3.7**
ADA 2010: **305.1**
CBC 2019: **11B-305.1**
PROWAG: **R404.2**

(9) Unit Cost: **$7950.00**
(10) Priority: **82**

- *Additional Items:*

Remount push button to 42" min. and 48" max. height to center of button. Provide 2" wide color coding with 1" wide dark borders located directly above control button. Provide push button which contrasts with surrounding housing. Provide an tactile arrow aligned parallel to the crosswalk direction on the sign. Provide voice or tone audible indication of the WALK interval at the pedestrian signal device. Provide a vibrotactile signal device that is integrated with the pedestrian pushbutton. Provide a button locator tone.

(11) Measurements (12)

Accessible Path	(y/n)	Yes
Clear Floor Space	(y/n)	Yes
Clear Floor Slope	(%)	**2.8**
Clear Floor X Slope	(%)	0.5
Button Ht.	(in)	**39.0**
Button Reach	(in)	0.0
Button Diameter	(in)	2.0
Button Pressure	(lbs)	0.0
Closed Fist Operation	(y/n)	Yes
Visual Contrast	(y/n)	**No**
Contrasting Color Bands	(y/n)	**No**
Vibrotactile Feedback	(y/n)	**No**
Audible Walk Indicator	(y/n)	**No**
Button Locator Tone	(y/n)	**No**
Tactile Arrow	(y/n)	**No**
Within 5 ft from crosswalk	(y/n)	Yes
1.5 - 6.0 ft from curb	(y/n)	Yes
10 ft minimum separation		>10ft

1. **Locator Number:** Corresponds to a unique database record tied to the specifi pedestrian signal which can be crossreferenced across this database and its corresponding FileMaker Pro and GIS databases.
2. **Orientation:** Corresponds to the specifi corner/pedestrian signal in any given intersection, unique to each corner:
   - NW, SW, SE, and NE are the most commonly used directions;
   - NNE, ENE, ESE, SSE, SSW, WSW, WNW, and NNW identify individual pedestrian signal system in situations involving multiple signal systems at one corner;
   - I-NW, I-NE, I-SW, I-SE, etc, identify pedestrian signal systems located on medians and pedestrian refuge island.
3. **Survey Street:** Survey street name.
4. **As-Built Description:** Description of as-built barrier based on applicable accessibility codes.
5. **As-is Measurement:** Existing condition/dimension featured on the signal system measured as the most severe barrier on the particular signal.
6. **Proposed Solution:** Description of steps necessary to remove barrier and, if applicable, an interim solution or notes.
7. **Cross Street :** Cross/intersecting street name.
8. **Codes / Info:**
   - PROWAG: Guidelines to enforce Federal accessibility standards in the public rights-of-way.
   - ADAAG/ADA 2010: The Federal Standard for accessibility adopted by the Department of Justice.
   - MUTCD The FHWA standards for traffic signs, road surface markings, and signals.
   - CBC 2019 California Building Code
9. **Unit Cost:** Estimated cost specifi solution per one unit. (The fina cost of barrier removal may exceed this estimate based on the year of mitigation, design approach and chosen method of mitigation)
10. **Priority:** Priority number assigned to specifi barrier based on priorization criteria which include: expected frequency of use and severity of the barrier. Measureed on a scale of 0 to 200, with 200 being the highest priority and 0 being the least.
11. **Ped. Signal Features:** Features of the pedestrian signal system measured to determine accessibility.
12. **Measurements:** Existing condition/dimension determined for each pedestrian signal system.
    - (in) measurement in inches
    - (%) measurement in percentage grade
    - **BOLD** text indicate non-compliant dimensions.
    - Normal text indicate compliant dimensions

35 **N** Push Button Reach Range

ADAAG: **4.2.5**
ADA 2010: **308.2.1**
CBC 2019: **11B-308.2.1**
PROWAG: **R406.2**

- *As-Built Description:*

  Where a forward/or side reach is unobstructed, the high forward/side reach is more than 48" or less than 42" above the ground.

- *As-is Measurement:* **39.0"**
- *Proposed Solution:*

  Reposition the pedestrian signal device to be less than 48" and more than 42" from the ground.

Unit Cost **$6150.00**
Priority **80**

- *Additional Items:*

Provide 2" wide color coding with 1" wide dark borders located directly above control button. Provide push button which contrasts with surrounding housing. Provide an tactile arrow aligned parallel to the crosswalk direction on the sign. Provide voice or tone audible indication of the WALK interval at the pedestrian signal device. Provide a vibrotactile signal device that is integrated with the pedestrian pushbutton. Provide a button locator tone.

- *As-Built Description:*

  Where a forward/or side reach is unobstructed, the high forward/side reach is more than 48" or less than 42" above the ground.

- *As-is Measurement:* **39.5"**
- *Proposed Solution:*

  Reposition the pedestrian signal device to be less than 48" and more than 42" from the ground.

Unit Cost **$6150.00**
Priority **65**

- *Additional Items:*

Provide 2" wide color coding with 1" wide dark borders located directly above control button. Provide an tactile arrow aligned parallel to the crosswalk direction on the sign. Provide voice or tone audible indication of the WALK interval at the pedestrian signal device. Provide a vibrotactile signal device that is integrated with the pedestrian pushbutton. Provide a button locator tone.

Priority **83**

- *As-Built Description:*

  The slope of the floor or ground surface at the pedestrian signal device exceed 1:48 (2%).

- *As-is Measurement:* **2.6%**
- *Proposed Solution:*

  Modify or repave the ground surface as necessary to provide slope (s) not exceeding the required 1:48 (2%) maximum in any direction.

- *Additional Items:*

Remount push button to 42" min. and 48" max. height to center of button. Provide 2" wide color coding with 1" wide dark borders located directly above control button. Provide an tactile arrow aligned parallel to the crosswalk direction on the sign. Provide voice or tone audible indication of the WALK interval at the pedestrian signal device. Provide a vibrotactile signal device that is integrated with the pedestrian pushbutton. Provide 2" diameter push button. Provide a button locator tone. Provide new push button and housing to allow for closed fist operation.

- *As-Built Description:*

The cross slope of the floor or ground surface at the pedestrian signal device exceed 1:48 (2%).

- *As-is Measurement:* **2.9%**
- *Proposed Solution:*

Modify or repave the ground surface as necessary to provide slope (s) not exceeding the required 1:48 (2%) maximum in any direction.

- *Additional Items:*

Remount push button to 42" min. and 48" max. height to center of button. Provide 2" wide color coding with 1" wide dark borders located directly above control button. Provide push button which contrasts with surrounding housing. Provide an tactile arrow aligned parallel to the crosswalk direction on the sign. Provide voice or tone audible indication of the WALK interval at the pedestrian signal device. Provide a vibrotactile signal device that is integrated with the pedestrian pushbutton. Provide a button locator tone.

Priority **80**

- *As-Built Description:*

Where a forward/or side reach is unobstructed, the high forward/side reach is more than 48" or less than 42" above the ground.

- *As-is Measurement:* **39.0"**
- *Proposed Solution:*

Reposition the pedestrian signal device to be less than 48" and more than 42" from the ground.

- *Additional Items:*

Provide 30"x48" level 2% max. clear space at base of signal device. Provide 2" wide color coding with 1" wide dark borders located directly above control button. Provide push button which contrasts with surrounding housing. Provide an tactile arrow aligned parallel to the crosswalk direction on the sign. Provide voice or tone audible indication of the WALK interval at the pedestrian signal device. Provide a vibrotactile signal device that is integrated with the pedestrian pushbutton. Provide a button locator tone.

  Where a forward/or side reach is unobstructed, the high forward/side reach is more than 48" or less than 42" above the ground.

- *As-is Measurement:* **39.0"**

Unit Cost **$6150.00**
Priority **78**

- *Proposed Solution:*

  Reposition the pedestrian signal device to be less than 48" and more than 42" from the ground.

- *Additional Items:*

Provide 2" wide color coding with 1" wide dark borders located directly above control button. Provide an tactile arrow aligned parallel to the crosswalk direction on the sign. Provide voice or tone audible indication of the WALK interval at the pedestrian signal device. Provide a vibrotactile signal device that is integrated with the pedestrian pushbutton. Provide a button locator tone.

- *As-Built Description:*

The slope of the floor or ground surface at the pedestrian signal device exceed 1:48 (2%).

- *As-is Measurement:* **4.6%**
- *Proposed Solution:*

Modify or repave the ground surface as necessary to provide slope (s) not exceeding the required 1:48 (2%) maximum in any direction.

- *Additional Items:*

Remount push button to 42" min. and 48" max. height to center of button. Provide 2" wide color coding with 1" wide dark borders located directly above control button. Provide an tactile arrow aligned parallel to the crosswalk direction on the sign. Provide voice or tone audible indication of the WALK interval at the pedestrian signal device. Provide a vibrotactile signal device that is integrated with the pedestrian pushbutton. Provide a button locator tone.

Total Costs for Pedestrian Signals at: Howard Rd *and* Shannon Ave — $7,950.00

Priority **62**

- *Proposed Solution:*

  Reposition the pedestrian signal device to be less than 48" and more than 42" from the ground.

- *Additional Items:*

Provide 2" wide color coding with 1" wide dark borders located directly above control button. Provide push button which contrasts with surrounding housing. Provide an tactile arrow aligned parallel to the crosswalk direction on the sign. Provide voice or tone audible indication of the WALK interval at the pedestrian signal device. Provide a vibrotactile signal device that is integrated with the pedestrian pushbutton. Provide a button locator tone.

- *As-Built Description:*

The slope of the floor or ground surface at the pedestrian signal device exceed 1:48 (2%).

- *As-is Measurement:* **5.3%**
- *Proposed Solution:*

Modify or repave the ground surface as necessary to provide slope (s) not exceeding the required 1:48 (2%) maximum in any direction.

- *Additional Items:*

Provide 2" wide color coding with 1" wide dark borders located directly above control button. Provide an tactile arrow aligned parallel to the crosswalk direction on the sign. Provide voice or tone audible indication of the WALK interval at the pedestrian signal device. Provide a vibrotactile signal device that is integrated with the pedestrian pushbutton. Provide a button locator tone.

- *As-is Measurement:* **38.0"**
- *Proposed Solution:*

Reposition the pedestrian signal device to be less than 48" and more than 42" from the ground.

- *Additional Items:*

Provide 2" wide color coding with 1" wide dark borders located directly above control button. Provide an tactile arrow aligned parallel to the crosswalk direction on the sign. Provide voice or tone audible indication of the WALK interval at the pedestrian signal device. Provide a vibrotactile signal device that is integrated with the pedestrian pushbutton. Provide a button locator tone.

- *As-Built Description:*

  Where a forward/or side reach is unobstructed, the high forward/side reach is more than 48" or less than 42" above the ground.

- *As-is Measurement:* **40.0"**

Unit Cost **$6150.00**
Priority **92**

- *Proposed Solution:*

  Reposition the pedestrian signal device to be less than 48" and more than 42" from the ground.

- *Additional Items:*

Provide 2" wide color coding with 1" wide dark borders located directly above control button. Provide push button which contrasts with surrounding housing. Provide an tactile arrow aligned parallel to the crosswalk direction on the sign. Provide voice or tone audible indication of the WALK interval at the pedestrian signal device. Relocate the pedestrian signal device to be less than 5' from the crosswalk line extended.Relocate the pedestrian signal device to be less than 10' from other pedestrian signal devices. Provide a vibrotactile signal device that is integrated with the pedestrian pushbutton. Provide a button locator tone.

- *As-Built Description:*

  The cross slope of the floor or ground surface at the pedestrian signal device exceed 1:48 (2%).

- *As-is Measurement:* **2.2%**
- *Proposed Solution:*

  Modify or repave the ground surface as necessary to provide slope (s) not exceeding the required 1:48 (2%) maximum in any direction.

- *Additional Items:*

Remount push button to 42" min. and 48" max. height to center of button. Provide 2" wide color coding with 1" wide dark borders located directly above control button. Provide an tactile arrow aligned parallel to the crosswalk direction on the sign. Provide voice or tone audible indication of the WALK interval at the pedestrian signal device. Provide a vibrotactile signal device that is integrated with the pedestrian pushbutton. Provide a button locator tone.

Pole-supported pedestrian traffic-control buttons is not identified with color coding consisting of a textured horizontal yellow band 2 inches in width encircling the pole, and a 1-inch wide dark border band above and below this yellow band.

- *Proposed Solution:*

Provide 2 inch wide color coding with 1 inch wide dark borders located directly above control button.

- *Additional Items:*

Provide an tactile arrow aligned parallel to the crosswalk direction on the sign. Provide voice or tone audible indication of the WALK interval at the pedestrian signal device. Provide a vibrotactile signal device that is integrated with the pedestrian pushbutton. Provide a button locator tone.

- *As-Built Description:*

  Where a forward/or side reach is unobstructed, the high forward/side reach is more than 48" or less than 42" above the ground.

- *As-is Measurement:* **50.0"**

Unit Cost **$6150.00**
Priority **108**

- *Proposed Solution:*

  Reposition the pedestrian signal device to be less than 48" and more than 42" from the ground.

- *Additional Items:*

Provide 2" wide color coding with 1" wide dark borders located directly above control button. Provide an tactile arrow aligned parallel to the crosswalk direction on the sign. Provide voice or tone audible indication of the WALK interval at the pedestrian signal device. Relocate the pedestrian signal device to be less than 10' from other pedestrian signal devices.Relocate the pedestrian signal device to be less than 1.5' - 6' from the curbline.Provide a vibrotactile signal device that is integrated with the pedestrian pushbutton. Provide 2" diameter push button. Provide a button locator tone. Provide new push button and housing to allow for closed fist operation.

Total Costs for Pedestrian Signals at: **W Yosemite Ave** ***and*** **S I St** **$52,800.00**

Total Cost for Street: **W Yosemite Ave** **$89,700.00**

Total Cost for City Pedestrian Signals: **$1,484,850.00**

iv. Priority Score

Definitions

Access Compliance Survey – Process taken to fulfill the requirements of a Transition Plan, by surveying and identifying physical barriers which impede accessibility to a program or service provided to the public.

Activity Score – Rating that summarizes a feature's expected frequency of use and its impact on individuals with disabilities.

Barrier Score – Rating that summarizes the severity of a feature relative to its deviation from current State and Federal Standards.

Curb Ramp – A ramp graded down from the top surface of a sidewalk to the surface of an adjoining street to provide connectivity within the Public Rights-of-Way.

Facility – A place housing a program or service for the public.

Feature – An element provided in the Public Rights-of-Way, including public sidewalks and streets, crosswalks, curb ramps, street furnishings, pedestrian signals, parking, etc. The four main features surveyed are 1) sidewalks, including gaps, 2) curb ramps, 3) pedestrian signals, and 4) bus stops.

Pedestrian Signal – Devices used at signalized intersections to notify pedestrians when it is safe to cross the street.

Priority Score – Rating that is the summation of both Activity Score and Barrier Score. This rating is used as criteria for determining barrier mitigation schedules that are a requirement of a Transition Plan.

PROW – *Refer to definition of "Public Rights-of-Way (PROW)"*

Public Rights-of-Way (PROW) – Public infrastructure such as streets, roads, or walkways under the responsibility or authority of a public entity, such as a City or County.

Title I – Regulations from the Americans with Disabilities Act specific to employment.

Title II – Regulations from the Americans with Disabilities Act specific to State and local government entities, including City and County governments.

Title III – Regulations from the Americans with Disabilities Act specific to areas of public accommodations and commercial facilities.

Transition Plan - A living document that inventories the physical barriers identified which impede accessibility to a public entity's programs and services. The document will identify

solutions to mitigate the barriers and set forth the steps necessary to achieve compliance via a timeline or schedule and designate an official responsible to maintain and update the document. The document is a requirement of the Americans with Disabilities Act and shall be made current and available for public inspection.

Activity Score

An Activity Score is a rating that summarizes a feature's (sidewalk (including gaps), curb ramp, pedestrian signal or bus stop) expected frequency of use and its impact on individuals with disabilities in the Public Rights-of-Way. A rating is assigned to a feature based on that feature's location in proximity to several categories.

In total, the Activity Score is scored on a scale of 0 to 100, with 0 being the lowest activity, and 100 being the highest activity. An Activity Score of 0 indicates that the feature is not expected to see any use by pedestrians based on its location. An Activity Score of 100 indicates that the feature is expected to see significant use by pedestrians due to its location.

The following categories are used to rate an Activity Score for each feature in the Public Rights-of-Way:

Table 1: Activity Score Category Breakdown

Category	Sub-Category	Specifications	Weight	Value	Score
Streets	Arterial	Adjacent Arterial Street	10	100%	10
	Collector	Adjacent Collector Street		50%	5
Transit Stops	All forms of Public Transit	Within 1/4 Mile of a Transit Stop	10	100%	15
Schools	Elementary School (Primary Education)	Within 1/4 Mile of Primary Education	12	100%	12
Parks	All Parks within the City	Within 1/4 Mile of a Park	10	100%	0
City Attractors	City-Owned Buildings	Within 1/4 Mile of City Buildings	12	50%	18
Pedestrian Generators	Medical or Social Services	Within 1/4 Mile of Medical or Social Services	12	50%	18
Population Density*	Population per Square Mile in each Census Block, as delineated by the U.S. Census.	No Population	12	0%	0
		> 0%-30%		30%	4
	*Categorized in GIS according to 4 Manual Intervals of 0%, 30%, 60%, and 100%	> 30%-60%		60%	8
		> 60%-100%		100%	12
Senior Population Density*	Population Age 65 and Older per Square Mile in each Census Block, as delineated by the U.S. Census.	No Population	12	0%	0
		> 0%-30%		30%	4
	*Categorized in GIS according to 4 Manual Intervals of 0%, 30%, 60%, and 100%	> 30%-60%		60%	8
		> 60%-100%		100%	12
No Sidewalk	Adjacent to an Incorporated Street without Sidewalks	A sidewalk, curb ramp, or pedestrian signals that is adjacent to a street without sidewalks.	10	100%	15
		Total Weight	**100**		

Barrier Score

A Barrier Score is a rating assigned to a feature (sidewalk (including gaps), curb ramp, pedestrian signal, or bus stops) in the Public Rights-of-Way based on the severity of the feature's existing conditions in comparison to current State and Federal Standards.

In total, the Barrier Score is scored on a scale of 0 to 100, with 0 being a feature that is compliant with current State and Federal Standards, and 100 indicating that the feature is completely noncompliant. All gaps along sidewalks and curb ramps that are required to be installed where there are none currently will be given a score of 100 to classify that they are the highest priority.

Categories used to rate a Barrier Score for each feature in the Public Rights-of-Way are specific to the feature being surveyed (sidewalk (including gaps), curb ramp, pedestrian signal, or bus stops).

The following categories are used to rate a Barrier Score for Sidewalks:

Table 2: Barrier Score Category Breakdown for Sidewalks

Category	Barrier Type	Weight	Quantity**	Value	Score
Heaving/Change in Level	Minor Change in Level (0.26"-0.74")	10	1-2 Incidents	30%	3
			3-5 Incidents	60%	6
			6+ Incidents	100%	10
	Major Change in Level (0.75" or greater)	20	1-2 Incidents	30%	6
			3-5 Incidents	60%	12
			6+ Incidents	100%	20
Cross Slope	Cross Slope Low (2%-5%)	10	10' or less	50%	5
			>10'	100%	10
	Cross Slope Medium (5%-8%)	15	10' or less	50%	7.5
			>10'	100%	15
	Cross Slope High (>8%)	20	10' or less	50%	10
			>10'	100%	20
Run Slope*	Running Slope Low (5%-8%)	2.5	10' or less	50%	1.25
			>10'	100%	2.5
	Running Slope Medium (8%-11%)	5	10' or less	50%	2.5
			>10'	100%	5
	Running Slope High (>11%)	7.5	10' or less	50%	3.75
			>10'	100%	7.5
Obstructions	Obstructions	10	1-2 Incident	50%	5
			3+ Incidents	100%	10
	Total Weight	100			

**Running Slope that matches street grade or less is considered compliant and therefore should receive a score of 0. Any running slope longer than 10 feet is assumed to match the street grade.*

*** Incidents are the barrier count along a run. For slope data it is the length of the category for the run. A run is usually from one intersection to the next, however a run could end mid-block depending on several factors.*

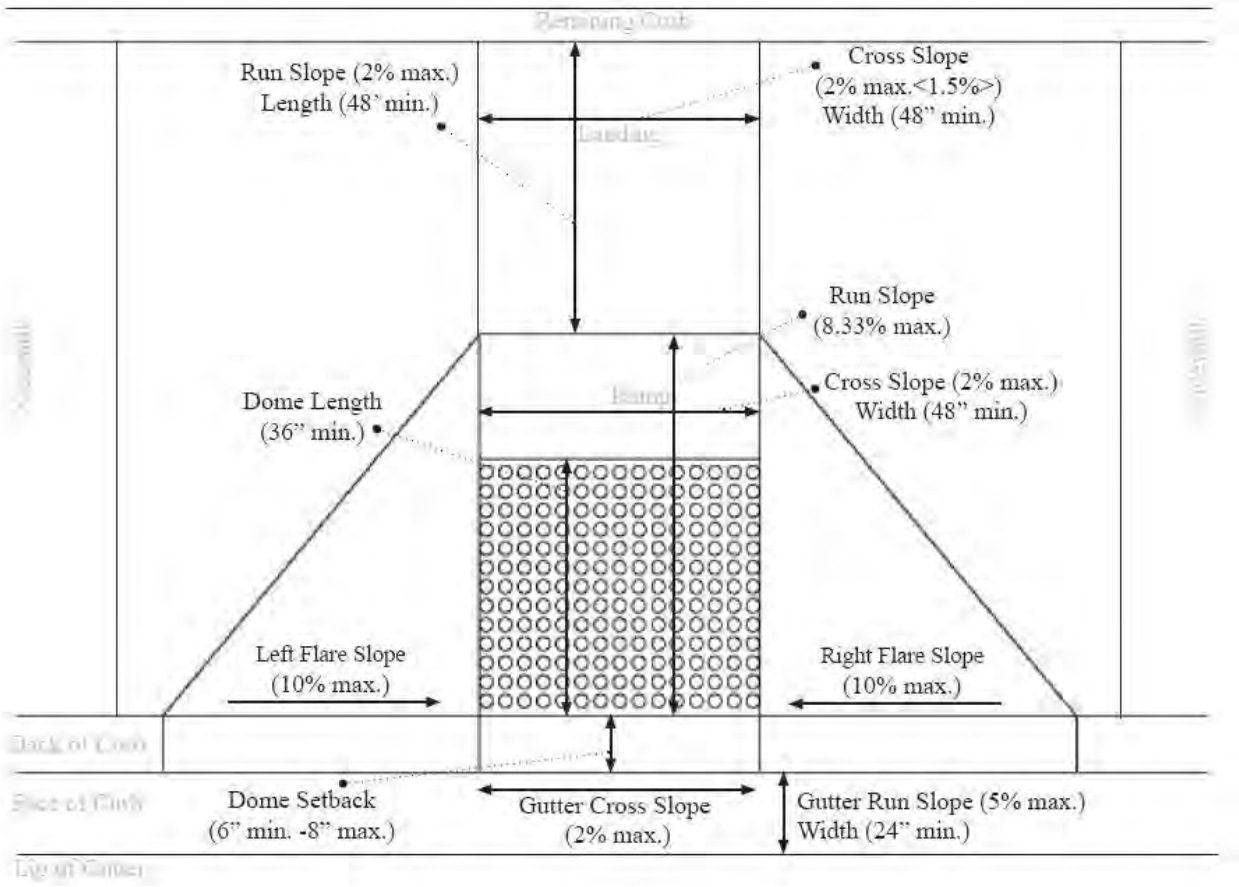

Figure 1: Curb Ramp Measurements Diagram (Perpendicular)

The following categories are used to rate a Barrier Score for Curb Ramps (Perpendicular):

Table 3: Barrier Score Category Breakdown for Curb Ramps (Perpendicular)

Barrier Type	Weight	Category	Value	Score
Width of Ramp	6	≤ 35.9"	100%	6

Within 5 ft from Crosswalk	3	NO	100%	3
		YES	0%	0
1.5 - 6.0 ft from Curbline	2.5	NO	100%	2.5
		YES	0%	0
10 ft Minimum Separation between Buttons	1	<10ft	100%	1
		>10ft or N/A	0%	0
Total Weight	**100**			

Priority Score

The Priority Score is a summation of both a feature's Activity Score and Barrier Score and is used as a criterion in planning out schedules for the order of barrier mitigation work.

Activity Score + Barrier Score = Priority Score

The Priority Score is rated on a scale of 0 to 200, with 0 being a feature that should have no priority for barrier mitigation work and 200 being a feature which should be at the forefront of any planned barrier mitigation work that uses funds dedicated solely for mitigating accessibility barriers identified in an ADA Transition Plan.

The Priority Score is designed to be equal in scale across the four primary features surveyed in the PROW (sidewalks, curb ramps, pedestrian signals, and bus stops), i.e. a Priority Score of 200 given to a curb ramp is equal to a Priority Score of 200 given to a sidewalk.

Note that the Priority Score serves as only one methodology for creating a schedule. Other methods and criteria can be used (and is encouraged) as the basis for forming a schedule including: 1) barriers identified by constituents through a special request, 2) barriers that overlap with a project already funded and scheduled, 3) barriers that can be resolved internally with maintenance staff, 4) grouping work geographically for cost efficiency, 5) etc.

Documentation for any additional methodology should be kept on record for justifying a barrier mitigation schedule.

APPENDIX G: PRIORITIZATION CRITERIA FOR BARRIER MITIGATION – FACILITIES

Table of Contents

i. **Definitions**

ii. **Priority Score**
Table 1: Priority Score Breakdown

iii. **Severity Score**

Definitions

Access Compliance Survey – Process taken to fulfill the requirements of a Transition Plan, by surveying and identifying physical barriers which impede accessibility to a program or service provided to the public.

Curb Ramp – A ramp graded down from the top surface of a sidewalk to the surface of an adjoining street to provide connectivity within the Public Rights-of-Way.

Facility – A place housing a program or service for the public.

Feature – An element provided in the Public Rights-of-Way, including public sidewalks and streets, crosswalks, curb ramps, street furnishings, pedestrian signals, parking, etc. The four main features surveyed are 1) sidewalks, 2) curb ramps, 3) pedestrian signals, and 4) bus stops

Pedestrian Signal – Devices used at signalized intersections to notify pedestrians when it is safe to cross the street.

PROW – *Refer to definition of "Public Rights-of-Way (PROW)"*

Public Rights-of-Way (PROW) – Public infrastructure such as streets, roads, or walkways under the responsibility or authority of a public entity, such as a City or County.

Self-Evaluation – A review of a public entity's policies, procedures, and practices in meeting the programmatic requirements of Title II of the Americans with Disabilities Act. The findings of the review and the modifications made as a result must be compiled and shall be made available for public inspection.

Title I – Regulations from the Americans with Disabilities Act specific to employment.

Title II – Regulations from the Americans with Disabilities Act specific to State and local government entities, including City and County governments.

Title III – Regulations from the Americans with Disabilities Act specific to areas of public accommodations and commercial facilities.

Transition Plan - A living document that inventories the physical barriers identified which impede accessibility to a public entity's programs and services. The document will identify solutions to mitigate the barriers and set forth the steps necessary to achieve compliance via a timeline or schedule, and designate an official responsible to maintain and update the document. The document is a requirement of the Americans with Disabilities Act and shall be made current and available for public inspection.

Priority Score

A Priority Score is a rating that rates the relative importance of addressing a barrier according to its impact upon the disabled population. The score considers the expected frequency of use and frequency of contact that the barrier will have with the public based on its location within a facility and where the public have access to.

The Priority Score is rated on a score ranging from 1 to 4, 1 being the highest priority, which are barriers that are expected to be in contact with the public consistently, and 4 being the lowest priority, which are barriers with minimal contact by the public. The scoring for the Priority Score is based on the following:

Table 1: Priority Score Breakdown

Priority 1	**Areas of basic public access**
	Accessible routes from site entry points to an accessible building entrance of the program location (EX. walks, ramps, accessible parking spaces, curb ramps, crosswalks at vehicular ways, passenger loading zones, etc.)
	Accessible route from accessible building entrances to “first contact points” (EX. information counters, public lobbies, elevators)
Priority 2	**Access to critical spaces of program function**
	(EX. Classrooms, assembly areas, meeting rooms, public offices, etc.)
Priority 3	**Access to public common areas that support program functions**
	(EX. Restrooms, drinking fountains, public telephones, etc.)
Priority 4	**Staff only areas not expected to be accessed by the public**

Severity Score

A Severity Score is a rating of the degree of deviation that the existing barrier has in comparison to applicable standards and the reparability of mitigating the barrier.

The Severity Score is rated on a score ranging from 1 to 4, 1 being the highest severity, and 4 being the lowest severity. Severity Scores are assigned on a case-by-case basis depending on the type of barrier and the most cost-effective solution to mitigate the barrier.

City of Madera Self-Evaluation and Transition Plan Public Input Meeting

In-person attendees:

DJ Becker, ADA Advisory Council Chairperson

Cynthia Ortegón, ADA Advisory Council Member

Dianna Robbins, ADA Advisory Council Member

Jack Porter, ADA Advisory Council Member

Carlos Guerrera, member of the public

Derek Robinson, member of the public

Ismael Hernandez, City of Madera Public Works

Nicki Rincon, City of Madera Parks & Community Services

Giachino Chiaramonte, City of Madera Police Department

Joseph Hebert, City of Madera Parks & Community Services

Mike Lima, City of Madera Finance Department

Will Tackett, City of Madera Community Development

Keith Helmuth, City of Madera Engineering

Wendy Silva, City of Madera Human Resources

Erica Gaitan, City of Madera Human Resources

Zoom attendees:

Sally Swanson Architects

Sally Swanson, CEO

Chris Sircello –Facilities Specialist

Sergio Valencia – GIS & Database Specialist

Tina Dorius –ADA Policy Specialist

Mattie Mendez, Community Action Partnership of Madera County

Graciela Valdez, Madera County Public Health

Correena Lipira, Madera County Public Health

Questions, Answers, and Feedback

DJ Becker

One of the big things is how do we proceed with this in a rational fashion and engage the public? I mean, obviously, we know the areas of concern in our city. How do we distill your data, which is voluminous, into kind of like a checklist or summary to prioritize and improve it, to spend our money wisely and for the benefit of pedestrian safety.

Sally Swanson

I think the first thing you have got to do is how much money do you have? So you must look at your budget and you must see how much money you have in your plan and what you can do with this.

And we've scored the barriers so that you would know what are the most important barriers that we explain. So you would take those and implement them.

What other budget do you have, but you first must decide how much money you have and how you're going to implement this and that might take 10 years, it might take a long time.

But you must really address the issues that are most important that were noted first.

If you're in need of more help, if you're in need of a spreadsheet that makes it very easy to simplify it, we've done that before, and we'll certainly give that to you, and we can work with you to prioritize within this spreadsheet what you must tackle first.

So we can take this big chunk of information and bring it to something very simple.

DJ Becker

But for this document to get implemented or get evaluated or to get maximum resident participation with, we need to simplify it a little bit, and kind of help residents understand, and prioritize it. And we've heard mostly that we've got unsafe curbs, unsafe, you know, curb uplift, you know, it's not complicated stuff. So do we have any ideas and suggestions. Cynthia, you had some thoughts on this.

Cynthia Ortegón

Yeah, because we had a Self-Evaluation plan done in 2010, I believe. And from then till now, we haven't really, we've done as best we can with the money that the city has and has put into it. But now we're 10 years later, and we still have a lot to do. So we'd like to just be able to basically put out a, for our education, we want to know what the priorities are. And we can do that with the database. I understand that we can look at it. It's a large document. The other one was printable. This one is huge, but if as long as the searchable, that's great.

Sally Swanson

Okay, so that's a question. Is it searchable?

Tina Dorius

Yes, they are. And we can give training, if that's helpful, on how to easily search the databases. I think you have the choice of either using the Excel spreadsheets or using BlueDag, the software for facilities, and BlueDag is exceptionally user-friendly.

DJ Becker

So drop a pin, drop a pin in a map type thing.

Tina Dorius

That might be GIS, I'm not sure. BlueDag, I know it's just you can, like let's say you guys fix a curb ramp or you fix a deficiency in a facility, you can mark it in the software, and it'll update for everybody and there's just a living record of it. So it keeps track of everything for now. if you have any, you know, staff changes, it's okay because again, that database is going to house everything.

Sally Swanson

If you're saying we could give you a spreadsheet, we could also give you training.

Tina Dorius

Yes, we'd like to train you. Additionally, Sally, I think getting public feedback and public input on where this plan should start is crucial. So I think, you know, really getting the public involved, finding out what are the top priorities for the public and putting that into consideration along with the way our rankings and priorities.

DJ Becker

And we just want to make this accessible for the majority of our residents because this is going to be a great resource behind Wendy's desk or online. But we have to be able to bridge the gap for the average resident, say, hey, we really are working on these things. So I don't know, maybe surveys, email, absolutely. We have a gap where people can, you know, right now they just call me or Cynthia, or, you know, and there's things that get lost in that translation. We need a better way for citizens and residents to express their concerns that I think is a top priority and to put it into layman's language where it's accessible and understandable.

What about a survey? Wendy, can we go out with a survey for residents or what do you suggest? How do we get the residents involved? And now that we have the data, how do we interface with the residents?

Sally Swanson

Could we use your website? Could we use flyers? Could we just have three or four sentences? A new issue every week?

Could we make it simple? We've done a lot on websites and maybe just making that an avenue. Maybe you would just have a check sheet that you have in the desks as people enter the city hall.

DJ Becker

Something very simple.

Sally Swanson

Do you want to hold a Zoom meeting with Zoom meeting with residents? Make it a date? We're going to have a Zoom meeting and talk about this and spread it in your website on the newspaper. Put a big sign in front of your building. You know, just really get the word out.

DJ Becker

Yeah.

Sally Swanson

We're available certainly to do that.

Frank Porter

I'd also like to know how much it costs for this survey to be put together. How much the City has already spent.

DJ Becker

So, Jack, what was your question? It's a legal requirement. So what's that? Yeah. the cost, the contract is a flat fee agreement for the services. We agreed not to exceed two hundred forty-four thousand five hundred fifty dollars. And that's paid as progress is made on the project.

DJ Becker

All right. Well, we have a gap to bridge there because we get a lot of verbal feedback, but it's not always translatable into what we need. So but we're pleased to have the evaluation. We know where to start. Um, what's the what's the summary process for you? What have you identified as our top priorities?

Chris Sircello

Well, I think you asked about some of the dangerous conditions. And so I do have something to comment on that.

We already talked about level changes, tripping hazards, and as well as those barriers to access like headroom issues, or protruding objects.

You'll find that term in there. I consider those to be dangerous conditions. If they protrude from the wall more than four inches, between 27 inches and 80 inches, they're considered dangerous and are protruding objects. It's a hazard. I would get rid of those thresholds that are too high, but another tripping hazard, just like a level change. So you come into a door, you've got a one and a quarter inch threshold there, definitely a dangerous condition as well as something that would be difficult to navigate in the wheelchair, let's say, or somebody just visually impaired.

Let's see, other dangerous conditions. You could even have a dangerous condition from something like a ramp that was just way too steep, let's say 12, 13% sloped ramp and you know, all of a sudden you get a runaway wheelchair on that. That's a pretty dangerous condition. Let me see here.

I'm trying to think of some more dangerous conditions, the lack of tactile exit signs, that could be dangerous if somebody really needs to find an exit in an emergency, those are the ones that come to mind right now.

DJ Becker

How about door loads? We have some doors that are so heavy that they're very, very difficult for a senior with a walk or any possible for somebody in a wheelchair or a power chair.

So that's something that comes to the top of my memory list, that's something I get chatted up about quite often.

Chris Sircello

Yeah, absolutely.

DJ Becker

We have several sidewalks with three to four-inch rises because of trees. Absolutely. Yeah, you hit them with a walker, you did it.

Correct pavement, no transitions from concrete to dirt. mean, it's very sidewalks, sidewalks that go into landscapes and don't come out.

Right. Yeah, so we kind of know where our area is, but that said, Public Works has been doing an awesome job with some block grant money filling in sidewalks and tearing out the old fixing uplift.

So we're limited in finances, so we're trying to prioritize. And I think this is our opportunity to really put our heads together and try to come up with some type of reasonable input and prioritize.

But I guess we need to work with you to figure out where we can best spend our money. And once we find out how much we have, and we're not concerned about the smaller things, we've got some really glaring deficiencies here now that are a safety hazard.

Well, we have the advisory committee, so we'll find the priorities and then advise them what we feel is going to be the best for the city and the citizens.

I think that'll work good as a team. We just have to get the priorities in a workable form for us to see and for the city council and the rest of the staff to see that we're really going to do this.

We're going to implement it based on what we have and the time and the management and the money and get the jobs done as quickly and as safely as we can.

Matty Menendez

One area I would suggest the report be shared is in the city letter which includes the city notice, the city utility bills.

Derek Robinson

I spent some time at Fresno State and I noticed their sidewalk and they have companies that come and grind down, you know, some of the, know, lift and the cement.

DJ Becker

Yeah, we have a grinder. We bought a grinder, I believe. Okay. And you see, and meantime, the trouble spot, you can put red paint and reflectors, know, get fixed with safety. Yeah, we've been doing that too. Ishmael has been all, and Public Works has been all over that. So, that's been a huge help. And we've had some uplifts as much as four feet up here within a week. been, you probably have more since all this wind. Yeah, well, I haven't checked lately, and I'm sure. four inches. Actually, we had a six-inch uplift on Mainberry, and I mean, I walk every probably every other day out there. I'm like, where would that come from? And it was literally six inches on Mainbury. There's a four inch overruns, Shenore, and that sidewalk that goes around on Riverside. And the other, the other issue, Wendy had a suggestion Ishmael on that reporting app, that, that we're tentatively going to use. There's some software interface or training or something that that's available. If we decide to move forward with that nine or that, what is it? 311. What was the name of that app? reporting app.

Derek

And then another thing is you might have to get rid of some problem trees. They're all over the place.

DJ Becker

So impairing visibility or passage or what? Yeah, some visibility, you know, is over the sidewalk and people not maintaining their landscape. Yeah. Have you reported that anywhere? I've been driving by and was, you know, they can't stop. Yeah. Well, and I tend to say, well, hey, go on the city website and report that. And the comments I get are not kind. So we have a, we have a. A gap between what residents are trying to report and what they expect and, and what's doable for them, I guess, maybe.

Keith.

We actually have a couple of projects.

That's the grant that ultimately built the two buildings at Fifth and C Street. There was. Okay. Yeah, the veterans project. Yeah, there was at least two miles where the sidewalks that were included in that project in that same area.

It will be on Caltrans. We're actually sharing some of the effort on the Caltrans right away. We had a grant. They had the project for the downtown and they were limited on funds. We said we would go ahead and overlap our grant on that project and go ahead and save the money to do some other areas. But yeah, we do have multiple sidewalks. We generally will put like $25,000 in there a year as a placeholder and that will be taken and move to projects. We don't technically go ahead and build $25,000 worth of sidewalks. just do a set aside on that so that we can go ahead and move it wherever we need to at a given time.
