Your early attention is suggested to the approval process from other City Divisions such as the Planning and Engineering Divisions, or other entities or agencies such as the San Joaquin Valley Air Pollution Control District, and the School Districts. These other departments or agencies may have requirements that could significantly affect the final design of the project. A Building Permit will not be issued by the Building Division until clearance from all other departments and agencies is obtained.

Fill out this application completely. Incomplete Submittals cannot be processed. See Minimum Submittal Requirements for required documentation.
