

DRIP IRRIGATION REBATE- \$150

City of Madera rebate to replace existing overhead spray sprinkler with drip irrigation.

Rebate for Drip Irrigation

Install a drip irrigation starter kit or convert your existing overhead sprinklers to drip irrigation with a drip irrigation conversion kit and you may qualify to receive a rebate of up to \$150.00 from the City of Madera. Drip irrigation eliminates over watering problems, by applying water only where and when it is needed, with less runoff and less evaporation from leaves and soil, the uniform application of water from drip irrigation systems can achieve high water savings. The conversion can save up to 9 gallons of water annually for each square foot of irrigated area converted.

Drip irrigation is the slow, precise application of water and nutrients directly to the plants' root zones in a predetermined pattern using a point source. A drip irrigation or trickle irrigation design can be customized to meet specific needs while maintaining an optimum moisture level within the root zones, efficiently conserving water that might otherwise be lost to non-growth areas, runoff, sun or wind, and providing the proper balance of water and air needed for successful plant growth.
