

# MULCH REBATE

A good mulch can conserve water by significantly reducing moisture evaporation from the soil. Mulch also reduces weed populations, prevents soil compaction, and keeps soil temperatures more moderate. The State Save Our Water Project estimates that mulch can save 20 to 30 gallons of water per 1,000 square feet each time you run irrigation.

The mulch rebate allows for a maximum of up to \$100 per City of Madera utility customer for the purchase of the mulch *plus* up to \$75 for delivery costs if applicable.
