SECTION 1. PURPOSE AND OVERVIEW OF THE STUDY

A. Purpose

The City of Madera (City) provides solid waste collection and disposal services through a franchise agreement with Mid Valley Disposal (Mid Valley) and last updated its solid waste rates in 2017, although the City has not performed a rate study in many years. Recent Proposition 218¹ (Prop 218) related court decisions² required the City to demonstrate the cost-basis of new rates, which must then be approved through Prop 218 noticing procedures.

To demonstrate this cost-basis, this comprehensive solid waste rate study evaluates revenue requirements and the estimated costs of collection and disposal services. Key objectives in this analysis include improving the fairness and equity among various customer classes and service levels and the defensibility of the City's rates. However, the most significant change is the cost the City will incur to comply with new State regulations³ (SB 1383) related to organics recycling programs, which is currently estimated to increase overall costs by approximately 35 percent. The recommended rates were developed in a manner that is consistent with industry standard cost-of-service principles and include a general SB 1383 surcharge. This surcharge may be adjusted later once actual costs and changes in services provided to customers are better understood. By documenting the rate study methodology and cost-of-service analysis, this report provides the necessary support for the Prop 218 approval process and helps the City maintain transparent communications with its residential and commercial solid waste customers.

NBS worked cooperatively with City and Mid Valley staff to develop collection and disposal costs assumptions. An overview of the rate study methodology is summarized below.

B. Overview of the Study

Comprehensive rate studies, whether for a water, sewer, or solid waste utility, include three key components:

- 1. **Financial Plan,** which identifies the current and projected costs and revenues, including the City's administrative and overhead costs, and the annual net revenue requirements for the solid waste utility that must be collected through solid waste rates.
- 2. **Cost of Service Analysis,** which determines the cost of providing service to each customer class and service level, such as the standard three-container service to residential customers vs. commercial types of service, such as two-cubic yard bin service with once-per-week pickups.
- 3. **Rate Design Analysis,** unlike water and sewer rate studies, which evaluate different alternatives for fixed and variable charges, solid waste rates are driven by the collection and disposal costs for each type of service, which are combined into a single fixed monthly charge⁴.

 ³ California Code of Regulations, Title 14, Division 7, Chapter 3, Article 6.0.
 ⁴ There is also a separate Administrative Fee, primarily for container replacement, collected from residential customers.

¹ California Constitution article XIII D, Section 6, commonly referred to as Proposition 218 [Prop 218].

² For example, the San Juan Capistrano court case (Capistrano Taxpayers Association, Inc. v. City of San Juan Capistrano, Opinion G048969, Superior Ct. No 30-2012-00594579, Filed April 20, 2015).

These three components embody the industry standards and fundamental cost-of-service rate making principles detailed in the American Water Works Association (AWWA) Principles of Water Rates, Fees, and Charges⁵, also referred to as the M1 Manual. They also represent the order in which the study was performed.

This methodology meets the Prop 218 requirements that rates not exceed the cost of providing the service, and that the rates are proportionate to the cost of providing service for all customers. That is, rates for one customer class do not subsidize the rates for another customer class.

The following sections briefly summarize each of the three study components, including the methodologies and general assumptions used in developing recommended solid waste rates. Section 2 then provides more detailed results, and the Appendix provides full documentation of how rates were developed.

FINANCIAL PLAN

NBS projected revenues and expenditures on a cash-basis for the next five years based on City budgets. The amount of rate revenue required to meet annual costs and maintain reserves at or near the recommended levels, is known as the *net revenue requirement*. As current rate revenue falls short of the net revenue requirement, rate adjustments -- or more accurately, adjustments in the total revenue collected from rates – are recommended. There is also a question about whether the City wants to include the costs of street sweeping services in solid waste revenue requirements and whether the Administrative Fee (Admin Fee) the City currently pays to Mid Valley should be collected from residential customers.⁶

COST OF SERVICE

As noted above, cost-of-service principles are generally the same whether applied to water, sewer, or solid waste rates. Since Prop 218 requires that solid waste rates demonstrate the cost basis for the monthly charges, this study relied on the best available assumptions about these costs⁷, including waste volumes and densities, time spent on collection routes, and the differences between the costs of residential vs. commercial vs. recyclable services and various other types of service.

As with any rate study, there are limits to the level of detail on individual customers and customer classes. For example: (1) individual residential solid waste customers dispose various amounts of trash and other materials, some more than the average and some less; (2) a particular commercial customer (say a 2-Cubic Yard (CY) bin picked up once per week) may dispose twice the average trash and/or may be located significantly farther from the normal commercial route.

While costs for individual customers may be more or less than average, cost-of-service analysis treats these customers as a "customer class", regardless of these individual differences. For example, standard single-family rates assume that all customers dispose of the same amount of trash, recyclables and green waste, and that differences in Mid Valley's travel distances to individual customers are not a factor in their rate. Likewise, all 2-CY bin commercial customers are assumed to dispose the average amount of trash. Otherwise, customer class rates would devolve into different rates for every single customer, for which there is insufficient data, and which is not administratively or practically feasible even if there was sufficient data.

⁷ Many assumptions were provided by Mid Valley Disposal based on their experience and actual costs.

⁵ Principles of Water Rates, Fees, and Charges, Manual of Water Supply Practices, M1, AWWA, seventh edition, 2017.

⁶ The City currently pays Mid Valley this fee for residential customers but does not collect it from these customers.

Additionally, general guidance on rate setting practices include the following observation: (1) rates do not need to be determined on a "parcel-by-parcel" basis but can be grouped and calculated on a "class-by-class" basis; (2) "apportionment" (i.e., allocation of costs) is not a determination that lends itself to a precise calculation; (3) apportionment in accordance with the City's informal, best cost estimates is sufficient, and (4) ratemaking data does not need to be perfect.⁸

Regarding the SB 1383 surcharge, this surcharge was calculated as a 35-percent across-the-board increase in proposed new solid waste rates. This assumes that this new regulation provides new services and environmentally based benefits to solid waste customers on a broad basis vs. specific new services (and benefits) to just a limited number of customers. Once the actual costs and specific programs are better understood, the City may need to refine this surcharge in terms of the total costs recovered and/or how it is allocated to individual customer classes.

RATE DESIGN

Rate design for solid waste rates is a far less complicated analysis than for water or sewer rates, where tradeoffs between fixed and volumetric charges must be considered. In contrast, solid waste rates are 100-percent "fixed" in that they use a single monthly rate that includes both collection and disposal for each type of service. However, several of the more generic criteria documented in various rate-setting manuals⁹ are typically considered in setting solid waste rates, including pricing policies, theories, and economic concepts. The following are the rate design attributes applicable to a sound solid waste rate structure:

- Rates are easy to understand from the customer's perspective.
- Rates are easy to administer from the utility's perspective.
- Rates are equitable and non-discriminating (that is, cost based).
- There is continuity in the ratemaking philosophy over time.
- Rates should address other utility policies (for example, encouraging waste reduction, recycling, and the economic development of the community).
- Rates should provide month-to-month and year-to-year revenue stability.

REGULATORY ISSUES

State regulations, beginning with AB 929 in 1989, have promoted waste reduction and recycling for the purpose of preserving landfill capacities and increasing the quantity of recyclable materials reused. The key regulatory issue the City is currently facing is SB 1383 which was recently adopted and mandates significant new organics and food waste recycling programs. These extensive regulatory mandates have an initial (Tier 1) implementation date of January 1, 2022. Mid Valley and the City are currently discussing how to meet these requirements, and Mid Valley has stated that these new programs typically increase overall costs by 35-40 percent. Although NBS is recommending the City implement an SB 1383 surcharge of 35 percent, these implementation discussions will play a role in future rate increases and the currently proposed surcharge may be adjusted as needed.

⁸ ACWA Board of Directors' Workshop Agenda Packet, July 30, 2015, Kelly Salt, Partner, Best Best & Krieger, LLP, pp. 6 and 8 of 95. ⁹ Such as the American Water Works Association (AWWA) Manual M1.

SECTION 2. SOLID WASTE RATE STUDY

A. Key Solid Waste Rate Study Issues

The City's solid waste rate analysis was undertaken with a few specific objectives, including:

- Maintaining annual revenues needed to sufficiently fund operational expenditures, including salaries and benefits of City staff, overhead/interfund charges, and regulatory compliance programs.
- Maintaining reserve fund levels to ensure future financial stability for the solid waste utility.
- Continuing to encourage recycling and waste reduction.
- Providing revenue stability for the Utility, particularly considering new regulatory mandates imposed by the State, such as SB 1383.
- Complying with Prop 218 requirements to ensure cost are properly allocated among customer classes and service levels.

The rate structure NBS proposed relied on these industry standards and cost-of-service principles. The recommended rates were calculated based on the net revenue requirements, number of customer accounts, and various assumptions and data provided by the City and Mid Valley.

B. Financial Plan

Besides meeting the overall goal of providing sufficient revenue to meet annual operating and regulatory costs, financial plans also strive to maintain reasonable reserves to handle emergencies and follow sound financial management practices to ensure the financial health of the solid waste utility. Rate adjustments are governed by the need to meet these objectives. The current financial status of the City's solid waste utility is as follows:

- Meeting Net Revenue Requirements: For Fiscal Year (FY) 2021/22 through FY 2026/27, the average projected net revenue requirement is approximately \$7 million per year. If no rate increases are implemented, the annual deficits are projected to grow from \$1.3 million in FY 2021/22 to \$2.2 million by FY 2026/27.
- **Operating Reserve Funds:** The operating reserve provides for fiscal emergencies such as revenue shortfalls or, more likely in the solid waste utility's case, unfunded regulatory mandates. The utility's operating reserve is considered an unrestricted reserve. Although this reserve would normally only need to be about 10 percent of annual operating expenses (given that over 60 percent of expenses are payments to Mid Valley), the utility should maintain a reserve balance of closer to 30 percent as a short-term funding backstop for SB 1383 compliance. This amounts to approximately \$1.8 million. Without rate increases, the ending balance of the operating reserves would go negative by more than \$9 million.
- Inflation and Growth Projections: Projected future revenue and expense assumptions were made based on current expectations, including the ongoing impacts of the Covid 19 pandemic and what appear to be accelerating inflation.
 - Although the City has some population growth, customer growth is conservatively assumed to be 0 percent.
 - General inflation is assumed to be 3 percent annually.
 - Growth in City salaries and benefits are assumed to be 1.5 percent per year.

• **Contractor Payments:** Mid Valley payments are the largest single expense and is projected assuming a general inflation rate of 3 percent annually. However, as noted above, the cost of compliance with SB 1383 will be a significant cost increase that has not yet been defined and is not included in these projections. Once the City has a better understanding of those costs, a significant future adjustment will likely be needed.

Rate revenue increases of ten percent (10 percent) in FY 2021/22 through FY 2024/25 and four percent (4 percent) in FY 2025/26 and FY 2026/27, will adequately fund operating expenses and, while maintaining less-than-optimal reserves, fixes the trending deficit and recommended levels will be achieved a few years after this five-year period.¹⁰ **Figure 1** summarizes the sources and uses of funds, net revenue requirements, and the recommended annual rate increases for the next five years. These projections do <u>not</u> include the assumed 35 percent surcharge needed to pay for the SB 1383 mandated costs.

Figure 2. Summary of Solid Waste Operating Reserve

Beginning cash balance for the Solid Waste Fund is found in CAFR. Source File: FY-2018-2019-Compren
 NBS recommends Solid Waste Fund will maintain a minimum of 90 days operating budget in reserves.

District's actual or budgeted interest earnings are used in analysis for unrestricted reserves in FY 2020/21. For 2021/22 and beyond, interest earning rates

are estimated at the 3-year average (FY 17/18 - 19/20) for funds invested in LAIF, per the California Treasurer's Office website, for the restricted reserves.

¹⁰ FY2021/22 rate increases were initially assumed to be effective April 2022 but now will be effective after June 30, 2022. Therefore, the 5-year rate period is FY 2022/23 through FY 2026/27.

Figures 3 and **4** graphically show the revenues and expenses and the reserve fund balances with and without rate increases.

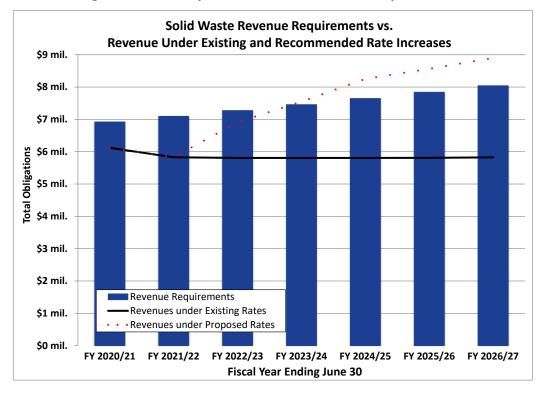

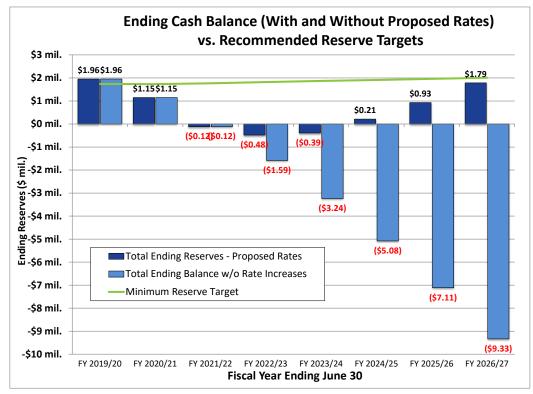

Figure 3. Summary of Solid Waste Revenue Requirements

C. Cost of Service Analysis

Once the total net revenue requirements are determined, the cost-of-service analysis determines the revenue collected from each customer class.¹¹ The three components of the cost-of-service analysis are collection and disposal expenses and the City's administrative and overhead costs. Since the City contracts for collection and disposal services with Mid Valley, the City does not have direct access to individual field operation costs such as driver salaries and benefits, cost of collection vehicles, general overhead, and profit. Those costs are embodied in the City's agreement with Mid Valley, but a detailed breakdown of those costs is not available. The following is a description of the methodology followed to establish cost-based solid waste rates.

SOLID WASTE RATE METHODOLOGY

The intent of the cost of service is to anchor rates to a cost basis reasonably reflecting actual costs. Since current rates have not been updated in many years and there is no clear record of how they were originally set, some of the new rates may be quite different than the current rate.

Residential and Commercial Customer Accounts – Standard residential service, which includes three 96gallon containers (grey for trash, blue for recyclables, and green for yardwaste/organics), account for 84 percent of all solid waste accounts¹². Typical commercial service varies by size of the bin (from 2-CY to 6-CY, and from once-per-week [1x/week] collection to six-days-per-week [6x/week]). There are also miscellaneous rates for individual containers, recyclable bins, compactor bins, and organics bins. These other rates are a small part of the overall solid waste rate revenues but are included in the various rate tables below.

Initial Rates – In general, disposal costs, which are based on discussions with Mid Valley, were calculated first. Disposal costs are assumed to be approximately 20 percent of overall rates. The remaining 80 percent is assumed to be a collection-related cost. There was no attempt to identify costs related to Mid Valley's overhead and/or profit, since those are proprietary costs and are embedded in the contracted rates the City pays Mid Valley under the franchise agreement.

True-Up Adjustments – Finally, since initial rate calculations are estimates of the actual collection and disposal costs, the revenue generated by these rates needs to be "trued-up" to the total net revenue requirement shown in the financial plan. To do this, separate across-the-board adjustments were used to calibrate the amount of rate revenue collected from residential customers, commercial bins service, and the remaining commercial customer classes.

Mid Valley estimated that 66 percent of systemwide costs are for residential service, while commercial accounts for the remaining 34 percent. Commercial bin service accounts for about 26 percent of the total revenue, with all other commercial classes making up about 8 percent of the total. Therefore, adjustments within each of these classes of customers (i.e., residential, commercial bin service, and all other commercial) were made to calibrate the rate revenues with the net revenue requirements. This approach maintains the overall cost basis between customer classes (i.e., they maintain fair and equitable shares of overall revenue), and thereby meets broader cost-of-service equity and fairness objectives.

The following is a more detailed description of the assumptions used and the rate calculations performed.

Disposal Costs – General assumptions are that trash weighs 125 lbs. per cubic yard and tipping fees are \$28/ton. According to Mid Valley, disposal costs for green waste and recyclables are approximately same as

¹¹ FY 2021/22 is the "test year" for this analysis; rates will be effective in FY 2022/23 and cover five years (through FY 2026/27). ¹² There are 13,822 standard residential accounts vs. 16,405 total accounts.

trash disposal, although we have set recyclables disposal costs at less than the cost for trash disposal because of the need to promote waste reduction and recycling. Since the City is mandated to achieve recycling and waste reduction goals, solid waste rates need to encourage this mandate. Industry standards for cost-ofservice analysis allows for adjustments such as these with the broader intent of ensuring that rates within each customer class are not subsidizing costs of other customer classes. Also, most recyclable costs are bundled along with standard residential service rates. All collection containers/bins are assumed to have the same amount of material (whether trash, green waste, organics, or recyclables). Lastly, commercial compactors are assumed to have a 3:1 density ratio (i.e., 375 lbs./CY vs. 125 lbs. for uncompacted trash).

Collection Costs – Residential and commercial collection costs for a 96-gallon container are assumed to be the same regardless of type of container (grey/green/blue), and larger containers (i.e., 2 CY - 6 CY bins) are assumed to be similar regardless of container size (i.e., while disposal costs directly correlate to size, the collection costs do not). However, there are cost differences between standard residential service and commercial bins service, based on assumptions provided by Mid Valley. For example, residential 96-gallon collection generally involves short travel distances between customers whereas commercial bin service takes significantly more driver time than an automated curbside pickup. We have relied on Mid Valley assumptions in setting the initial rates by type of service.

The 13,822 residential standard service customers have a current rate of \$15.59/month, which is lower than the rate that the City pays Mid Valley. Therefore, the initial rate was set above the current rate before being adjusted to meet net revenue requirements. Mid Valley estimates that commercial bin rates for 1x/week service are artificially low and should be increased.¹³

In general, additional commercial pickups/week are assumed to be a straight multiple of the 1x/week service and "carryout" rates were assumed to be significantly higher than for automated curbside service, with the difference between automated and carryout assumed to be similar to the differences in current rates. For commercial compactor rates, although disposal costs reflect a 3:1 density ratio, collection costs are like those for commercial bins.

Administrative Fees – In 2018, the City transitioned certain services over to Mid Valley, including replacing residential containers and handling service calls. The City negotiated a Mid Valley reimbursement fee of \$2.33 per residential account for these services, which amounts to approximately \$400,000 per year. The City has not collected this fee from customers in the past but needs to begin doing so going forward. This cost is already included in the net revenue requirements for FY 2021/22, since it is a part of Mid Valley's fees.

Current Rate Revenue vs. the Costs of Mid Valley Services – **Figure 5** below summarizes the estimated current solid waste rate revenue the City receives¹⁴ and the costs of Mid Valley services based on the most recent invoice for January 2021. This Figure shows that approximately 70 percent of the City-collected revenue comes from residential customers (vs. Mid Valley's estimate that residential is about 66 percent of actual costs), while commercial customers account for about 30 percent of the revenue (vs. Mid Valley's estimate that commercial represents about 34 percent of actual costs). The Mid Valley percentages are assumed to better represent the actual costs of service (based on discussions with City and Mid Valley staff).

 ¹³ The City's rate for commercial 2-CY, 3-CY, and 6-CY with 1X/week service is less than what the City pays Mid Valley. For comparison, Mid Valley's reimbursement rate for standard residential service is only 64 percent of the rate the City charges.
 ¹⁴ As the most recent financial data, the \$5.375 million revenue shown in this figure is slightly higher than shown in the City budget (i.e., \$5.266 million).

City and Mid Valley Revenue From Current Rates - FY 2021/22 (Based on Jan '21 MVD Payment)

Figure 5. Summary of Current Rate Revenue & Costs of Mid Valley Services

1. Overall allocation of residential vs. commercial revenue requirements is about 66%/34% per Mid Valley Disposal.

2. Total Revenue based on Current City rates and number of accounts as of January 2021.

Proposed Revenue Requirements – Based on discussions with City staff, the new solid waste rates should include street sweeping costs and an SB 1383 surcharge. These costs would be allocated to all customers (i.e., residential and commercial), while the Admin Fee is only paid by the residential customers (i.e., single- and multi-family customers). **Figure 6** summarizes these components of the revenue requirements and **Figure 7** summarizes the total revenue generated by the new rates by customer class. These figures include the first-year increase in total rate revenue, street sweeping costs, and the SB 1383 surcharge of 35 percent, totaling \$7.8 million. These costs are discussed in more detail below.

Figure 6. Summary of Components of the Revenue Requirements

Summary of FY'21/22 Solid Waste Co	osts	Notes:
Net Rev. Reqts. (from Financial Plan)	\$5,792,971	From Fin. Plan (Figure 1) - Includes proposed rate increase ¹
less Admin Fees (already included in the above)	(\$400,583)	Separately allocated to Single- and Multi-Family Resid. ²
Street Sweeping Costs	\$406,637	Offsets current Street Sweeping fees being collected ³
Net Rev. Reqts Including Street Sweeping	\$5,799,025	Allocated 66% to Residential, 34% Commercial
SB 1383 Surcharge (35%)	\$2,029,659	35% of Net Rev. Reqts.
Net Rev. Reqts Incl. Street Sweeping & Surcharge	\$7,828,683	Excludes Admin Fees separately applied to Residential

1. Assume adoption April 1, 2022 means only 25% of the rate increse is collected in FY'21/22.

2. Calculated as \$2.33/account times residential containers to which this fee applies. This is applied separately to these customers.

3. Street Sweeping fees from the Financial Plan. There are other street sweeping costs already included in Net Revenue Requirements.

Figure 7. Summary of	Proposed Rate Revenue
----------------------	-----------------------

Proposed Rate Revenue - FY 2021	/22		INCLUDING STREET SWEEPING & 35% SURCHARGE							
Customer Class	Rate Revenue ¹	% of Total ²	35% Surcharge	Total Revenue	% of Total					
Single Family Residential	\$3,692,620	63.7%	\$1,292,417	\$4,985,038	63.7%					
Multi-Family Residential	\$134,736	2.3%	\$47,157	\$181,893	2.3%					
Total Residential	\$3,827,356	66.0%	\$1,339,575	\$5,166,931	66.0%					
Commercial 96-Gal. Service	\$68,453	1.2%	\$23,959	\$92,412	1.2%					
Commercial Bin Service	\$1,519,344	26.2%	\$531,770	\$2,051,114	26.2%					
Commercial Recycling	\$352,275	6.1%	\$123,296	\$475,572	6.1%					
Commercial Compactor	\$2,262	0.0%	\$792	\$3,053	0.0%					
Commercial Organics	\$29,334	0.5%	\$10,267	\$39,601	0.5%					
Total Commercial	\$1,971,668	34.0%	\$690,084	\$2,661,752	34.0%					
Total Revenue - FY 2021/22	\$5,799,024	100.0%	\$2,029,658	\$7,828,682	100.0%					

1. Total Revenue based on Proposed Rates and number of accounts as of January 2021, including rate increases and Street Sweeping costs.

2. Overall allocation of residential vs. commercial revenue requirements is about 66%/34% per Mid Valley Disposal.

3. Admin Service Fees of \$2.33/residential account will be separately added to residential customers rates.

Street Sweeping Fees – The City currently has a street sweeping fee of \$0.0248 per foot of street exposure and a fee of \$0.0125 for additional cleaning. The City currently expects to collect about \$406,637 from these fees in FY 2021/22, although actual costs are approximately \$660,000 with the difference of about \$261,000 funded by the City's General Fund and other Enterprise fund transfers. The nexus of the benefits of street cleaning to either the per-foot charges or the costs collected from various residential and commercial customers is not abundantly clear¹⁵, and NBS recommends incorporating the street sweeping costs into solid waste rates on a broader basis from all customers. While this would increase solid waste rates, it would also eliminate the current street sweeping charges.

The street sweeping program benefits solid waste customers in two ways: (1) the direct benefit to residents and businesses receiving the street/curb cleaning in front of their home and/or business and, (2) improved sanitation and trash removal in other public areas (streets) not necessarily tied to an individual solid waste customer. The nexus between these street sweeping benefits and the cost allocated to all solid waste customers would support including these costs on an across-the-board basis.

While there can also be a case made for allocating some of the street sweeping costs to water customers (related to protecting groundwater quality), or drainage customers (removing trash from streets helps reduce trash accumulating in drainage catch-basins thereby reducing flooding), the benefit seems more directly tied to solid waste customers. NBS recommends the City's legal counsel review this approach before proceeding with adding street sweeping costs to solid waste rates.

SB 1383 Surcharges – As discussed above, compliance with SB 1383 is estimated to cost an additional 35-40 percent more than the revenue requirements shown previously in Figure 1. This 35 percent surcharge would generate an additional \$2.0 million in revenue used to cover the cost of newly mandated SB 1383 programs.

D. Rate Design Analysis

As previously mentioned, the rate design for solid waste rates is a fixed charge tied to estimates of the actual costs for collection and disposal rather than the combinations of fixed and variable charges used in water rates. Also, rates are calculated on a customer class basis rather than for each individual customer. For example, most individual residential customers dispose of different amounts of trash than the average residential customer (i.e., its higher or lower than average), but rates are not tailored to individual customers. The same is true for commercial customers; commercial services provide each customer with the opportunity or capacity to dispose of the volume of waste as defined by their container size, regardless of whether each customer fully utilizes that capacity.

The City's current solid waste rates reflect the container size and the number of pickups per week, and NBS recommends that the City continue with this rate structure. Based on reasonable cost estimates and assumptions,¹⁶ NBS updated the collection and disposal components of the rates and then calibrate these rates to match the revenue requirements that should be collected from each customer class (e.g., residential vs. commercial customers).

Also, the City's current rate schedule includes "non-functional" rates for which there are either no customers and/or there are no plans to provide a type of service in the future. For example, there are only two compactor bins service accounts, but the rate schedule includes rates for multiple bin sizes (i.e., 2 CY, 3 CY, 4

¹⁶ The assumptions are primarily provided by Mid Valley staff and relate to systemwide collection and disposal practices and costs.

¹⁵ The City has no formal documentation of how these rates were developed or the rationale for this approach.

CY, 5 CY, and 6 CY) and pickups from 1X/week through 6X/week. Likewise, there are only two commercial 5 CY bin service accounts and Mid Valley will be phasing out this service and converting these customers to another size of bin.

Lastly, NBS is recommending the proposed solid waste rates include: (1) the Admin Fee that the City currently pays Mid Valley for each residential account but has not collected from customers; (2) street sweeping costs; and (3) the 35 percent SB 1383 surcharge. These costs were not previously included customer rates.

The following section outlines the results of the rate analysis and compares the current vs. proposed new solid waste rates that include the Admin Fee, street sweeping costs, and the 35 percent SB 1383 surcharges.

E. Proposed Solid Waste Rates

This section summarizes the current and proposed new rates. For purposes of clarity, we have excluded rates that currently have no customers. The Appendix includes more detailed rate schedules that include all the rates currently in the City's rate schedule.

Figure 8 shows the monthly rates for residential and commercial customers receiving 96-gallon container service. The standard residential service, which includes over 90 percent of these services, includes three containers (trash, recyclables, and organics/green waste). **Figure 9** shows the rates for commercial bin service, and **Figures 10** and **11** shows the rates for other commercial services.

F. Comparison of Current and Proposed Solid Waste Monthly Bills

Figure 12 compares the City's current residential rates to the proposed rates with the street sweeping costs and SB 1383 surcharges. The proposed residential rates also include the Admin Fee of \$2.33/account, which does not apply to accounts with additional containers. **Figure 13** shows a detailed breakdown of the proposed single-family rate along with the current rate and the rate that the City pays Mid Valley. **Figure 14** compares the City's current commercial rates to the proposed rates with the street sweeping costs and SB 1383 surcharges.

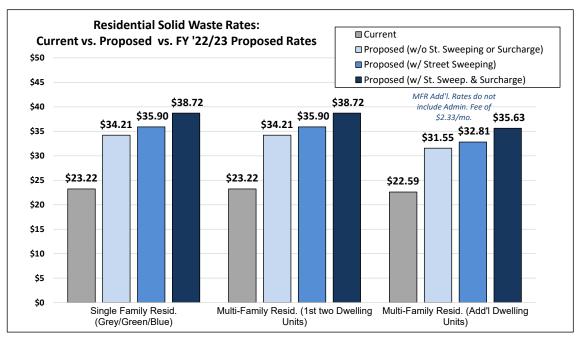

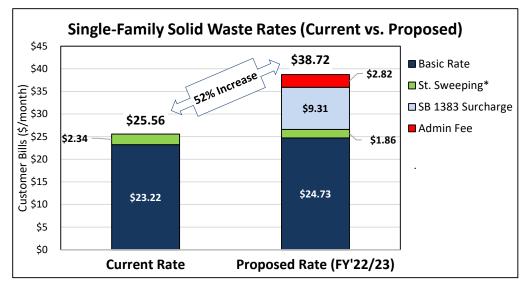

Figure 13. Details of Single-Family Solid Waste Rates

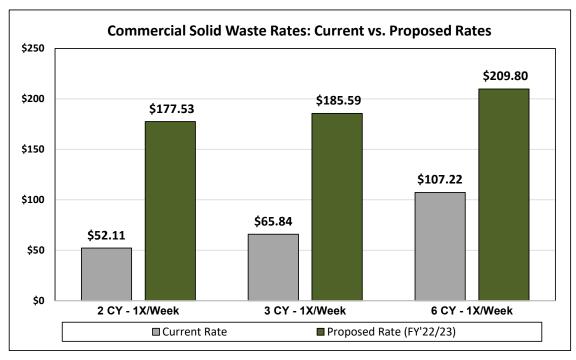

Figure 14. Solid Waste Rates - Commercial Bin Services

SECTION 3. RECOMMENDATIONS AND NEXT STEPS

A. Consultant Recommendations

NBS recommends the City take the following actions:

Approve and Accept this Study: NBS recommends the City Council formally approve and adopt this Study and its recommendations and proceed with the steps required to implement the proposed rates. This will provide documentation of the rate study analyses and the basis for analyzing potential changes to future rates.

Implement Recommended Levels of Rate Adjustments and Proposed Rates: The Council should direct City staff to mail out Prop 218 notices to customers. Then, based on successfully meeting the Prop 218 procedural requirements, the Council should proceed with implementing the 5-year schedule of proposed rates and rate adjustments previously shown in Figures 8 through 11.¹⁷ This will help ensure the continued financial health of the City's solid waste utility.

B. Next Steps

Annually Review Rates and Revenue – Any time an agency adopts new utility rates or rate structures, those new rates should be closely monitored over the next several years to ensure the revenue generated is sufficient to meet the annual revenue requirements. In particular, the new costs associated with implementation of SB 1383 mandates will need to be monitored.

Note: The attached Appendix provides more detailed information on the analysis of the solid waste revenue requirements and cost-of-service analyses that have been summarized in this report.

C. NBS' Principal Assumptions and Considerations

In preparing this report and the opinions and recommendations included herein, NBS has relied on several principal assumptions and considerations regarding financial matters, conditions, and events that may occur in the future. This information and these assumptions, including City's budgets, cost information and assumptions from Mid Valley and City staff were provided by sources we believe to be reliable, although NBS has not independently verified this data.

While we believe NBS' use of such information and assumptions is reasonable for the purpose of this report and its recommendations, some assumptions will invariably not materialize as stated herein and may vary significantly due to unanticipated events and circumstances. Therefore, the actual results can be expected to vary from those projected to the extent that actual future conditions differ from those assumed by us or provided to us by others.

¹⁷ Depending on whether the City intends to eliminate rates that have no customers or will be discontinued, the rates adopted would be either those shown in Figures 8 through 11 or the rate schedule shown in Appendix Table 30.

Appendix: Detailed Solid Waste Study Tables and Figures

The following tables and figures are presented in the order of the three rate study components previously mentioned in Section 1.B. (i.e., Financial Plan, Cost-of-Service Analysis, and Rate Design).

	Projection	Budget			Proj	ected		
RATE REVENUE REQUIREMENTS SUMMARY	FY 2019/20	FY 2020/21	FY 2021/22	FY 2022/23	FY 2023/24	FY 2024/25	FY 2025/26	FY 2026/27

Ending vs. Target - Annual Surplus/(Deficit)	\$ 215,229	\$ (579,107)	\$ (1,887,135)	\$ (2,299,521)	\$ (2,258,777)	\$ (1,696,552)	\$ (1,026,935)	\$ (223,869)
Annual Interest Earnings Rate ³	0.00%	1.86%	1.86%	1.86%	1.86%	1.86%	1.86%	1.86%

1. Beginning cash balance for the Soild Waste Fund is found in CAFR. Source File: FY-2018-2019-Comprehensive-Annual-Financial-Report.pdf, Page 42.

2. NBS recommends Solid Waste Fund will maintain a minimum of 90 days operating budget in reserves.

3. District's actual or budgeted interest earnings are used in analysis for unrestricted reserves in FY 2020/21. For 2021/22 and beyond, interest earning rates are estimated at the 3-year average (FY '17/18 - '19/20) for funds invested in LAIF, per the California Treasurer's Office website, for the restricted reserves. Source: https://www.treasurer.ca.gov/pmia-laif/historical/annual.asp.

TABLE 27 : Summary of FY'21/22 Solid Waste Costs		
Summary of FY'21/22 Solid Waste Co	osts	Notes:
Net Rev. Reqts. (from Financial Plan)	\$5,792,971	From Fin. Plan (Figure 1) - Includes proposed rate increase ¹
less Admin Fees (already included in the above)	(\$400,583)	Separately allocated to Single- and Multi-Family Resid. ²
Street Sweeping Costs	\$406,637	Offsets current Street Sweeping fees being collected ³
Net Rev. Reqts Including Street Sweeping	\$5,799,025	Allocated 66% to Residential, 34% Commercial
SB 1383 Surcharge (35%)	\$2,029,659	35% of Net Rev. Reqts.
Net Rev. Reqts Incl. Street Sweeping & Surcharge	\$7,828,683	Excludes Admin Fees separately applied to Residential

1. Assume adoption April 1, 2022 means only 25% of the rate increse is collected in FY'21/22.

2. Calculated as \$2.33/account times residential containers to which this fee applies. This is applied separately to these customers.

3. Street Sweeping fees from the Financial Plan. There are other street sweeping costs already included in Net Revenue Requirements.

TABLE 28 : Proposed Rate Revenue	- FY 2021/22				
Proposed Rate Revenue - FY 2021	/22		INCLUDING STRE	ET SWEEPING & 35	% SURCHARGE
Customer Class	Rate Revenue ¹	% of Total ²	35% Surcharge	Total Revenue	% of Total
Single Family Residential	\$3,692,620	63.7%	\$1,292,417	\$4,985,038	63.7%
Multi-Family Residential	\$134,736	2.3%	\$47,157	\$181,893	2.3%
Total Residential	\$3,827,356	66.0%	\$1,339,575	\$5,166,931	66.0%
Commercial 96-Gal. Service	\$68,453	1.2%	\$23,959	\$92,412	1.2%
Commercial Bin Service	\$1,519,344	26.2%	\$531,770	\$2,051,114	26.2%
Commercial Recycling	\$352,275	6.1%	\$123,296	\$475,572	6.1%
Commercial Compactor	\$2,262	0.0%	\$792	\$3,053	0.0%
Commercial Organics	\$29,334	0.5%	\$10,267	\$39,601	0.5%
Total Commercial	\$1,971,668	34.0%	\$690,084	\$2,661,752	34.0%
Total Revenue - FY 2021/22	\$5,799,024	100.0%	\$2,029,658	\$7,828,682	100.0%

1. Total Revenue based on Proposed Rates and number of accounts as of January 2021, including rate increases and Street Sweeping costs. 2. Overall allocation of residential vs. commercial revenue requirements is about 66%/34% per Mid Valley Disposal.

3. Admin Service Fees of \$2.33/residential account will be separately added to residential customers rates.
